

EPSON PRINTER PAPERS

ENHANCED MATTE

“The” standard print paper.
Most typography and images
fair well with this stock.

PREMIUM GLOSSY

Very reflective, very glossy paper.
Good for flamboyancy in photography,
especially when used as posters.

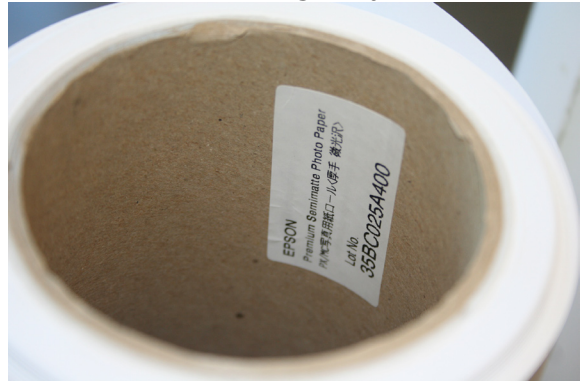

DOUBLEWEIGHT MATTE

Thicker than enhanced matte, best for matte
pints with a lot of true black (dries faster).

SEMIMATTE

In between luster and glossy in reflectiveness.
Smooth texture like glossy, dries faster than luster.

ADHESIVE

Is adhesive. Hooray!

LUSTER

Least reflective glossy paper, slightly
textured. Professional looking for photography
and some graphic design.
